Subject: Policy/Action proposals

Aloha all,

Please print for today.

Mahalo,
Kai

Policy:

Protect ocean and stream water quality by requiring that wetlands be preserved, along with surrounding naturally vegetated buffer areas that are adequate to shield wetlands from polluted runoff, soil erosion, toxic chemicals and other human disturbances.

Parks are a vital part of infrastructure and shall be provided an adequate level of funding for planning, development and maintenance.

Action:

Provide funds for planning, development, acquisition and maintenance of areas designated as park/open space on the Community Plan Map with a priority on beach park expansion.
