

Responsible Stewardship of Resources, Culture and Character

1. Encourage existing loi cultivation within West Maui (Ukumehame, Olowalu, Kahoma, Hokokahau), and support new loi cultivation in other areas that were traditionally cultivated.
2. Encourage CWRM to establish in-stream flow standards for streams that have not been set.
3. Support a thriving paddling community at canoe beach with 1) broader community and Kaanapali Resort support through collaborative actions such as shared parking with the Resorts and shuttle service during canoe races especially State races; and 2) build a canoe hale structure for storage of canoes.
4. Install ahupaa signs throughout West Maui.
5. Encourage DLNR to complete the Honolua Bay – Lipoa Point management plan.
6. Create a management plan for areas that are or will soon become over capacity such as mile-marker 14.
7. Build a community center that allows for hula halau practices by various halua.
